

Microsoft SharePoint Designer 2007: Levels 1 – 2 Instructor-Led (Classroom) - One Day Per Level

Level 1 - Course Description

You've created intranet sites using Microsoft Windows SharePoint Services. There will be times when you would want to build sites that lay emphasis on your company's unique requirements and sites that align themselves with the company's unique brand identity. In this course, you will use Microsoft SharePoint Designer 2007 to customize your SharePoint sites and build a new subsite on the SharePoint services platform.

Who Needs To Attend

This course is intended for SharePoint web designers and SharePoint solution developers, who want to learn to customize SharePoint sites by enhancing the look and feel of a SharePoint site and also to create dynamic pages using Web Parts and workflows.

Prerequisites

Students should have taken the Microsoft Windows SharePoint Services 3.0: Level 1 course or have an equivalent knowledge. Recommended, though not required, are the following courses:

- Microsoft Windows SharePoint Services 3.0: Level 2
- Cascading Style Sheets (Third Edition)

Course Fee

\$245

Level 2 - Course Description

Now that you know how to create customized SharePoint sites matching your branding, you may want to extend your sites to include more functionality. With SharePoint Designer, you can extend your sites more easily than before.

Who Needs To Attend

This course is intended for entry-level SharePoint solution developers who are currently capable of creating basic SharePoint sites using the out-of-the-box functionality provided by the built-in SharePoint Designer templates, and who now want to extend or create SharePoint sites with functionality by incorporating server web controls, data controls, customized workflows, and administration.

Level 2 - Course Description (Continued)

Prerequisites

It is recommended that the student complete the Microsoft SharePoint Designer 2007: Level I course prior to this course.

Course Fee

\$245
