### **Datanamics Inc. Renews Advanced Wireless LAN Specialization from Cisco®**

**(Henderson, Nev.)** – Datanamics Inc. announced today that it has renewed its Advanced Wireless LAN Specialization from Cisco®. This specialization recognizes Datanamics Inc. has again fulfilled the training requirements and program prerequisites to sell, deploy and support advanced Cisco Wireless LAN solutions.

“As the appeal of being available anytime, anywhere, through a variety of multimedia devices emerges, stable and secure wireless networks are vital,” says Terry McGowan, president of Datanamics, “our continued training and certification in this specialization demonstrates our commitment in providing the best possible wireless solutions to our customers.”

“As a Cisco Advanced Wireless LAN Specialized Partner, Datanamics Inc.’s training investment ranks them among the industry’s most-qualified in providing wireless LAN solutions,” said Wenceslao Lada, vice president of worldwide channels borderless network architectures at Cisco.

The Cisco Advanced Wireless LAN Specialization is designed to help the company’s channel partners deliver the wireless solutions their customers need to increase their productivity and responsiveness, extend applications beyond the wired network, and overcome obstacles encountered with traditional wired communications. Cisco Advanced Wireless LAN Specialized Partners are able to build solutions based on the entire suite of Cisco wireless LAN products, including Cisco access points, Cisco Unified Wireless LAN Management solutions, Cisco Wireless LAN Controllers, Cisco wireless bridge solutions, Cisco wireless LAN client adapters and Cisco Unified IP Phone 7900 Series handsets.

The Cisco Resale Channel Program provides partners with the training required to build sales, technical and Cisco Lifecycle Services skills, and then validates their skills through a third-party audit. Cisco resale partner certifications—Select, Premier, Silver and Gold—represent an increasing breadth of skills across key technologies and a partner’s ability to deliver integrated networking solutions. Cisco resale partner specializations—SMB, Express, Advanced and Master—reflect an increasing depth of sales, technical and

service expertise in particular technologies. Achieving Cisco Advanced Wireless LAN Specialization also provides Datanamics Inc. access to comprehensive sales, technical, and lifecycle services training and support available from Cisco.
