Datanamics, Inc. Renews Its Express Foundation Specialization from Cisco®

(Henderson, NV) – Datanamics, Inc. announced today that it has renewed its Cisco Express Foundation Specialization. To renew this specialization, Datanamics must continue to fulfill the training requirements and program prerequisites to sell, deploy and support integrated Cisco network solutions. The Express Foundation Specialization is the first Cisco specialization that brings together key solutions for Cisco routing, switching, wireless and security products.

“Datanamics is pleased to renew our Express Foundation Certification from Cisco, doing so enables us to promote our expertise and relationship with Cisco to our customers,” said Terrence McGowan, president of Datanamics. “The benefits provided allow us to continue to enhance the offerings that we offer to customers.”

“As a Cisco Express Foundation Specialized Partner, Datanamics’s investment in the training required to provide integrated network solutions ranks them among the industry’s most qualified,” said Edison Peres, vice president and chief go-to-market officer for worldwide channels at Cisco.

Designed to focus on the customer network infrastructure and to support new network capabilities, the Cisco Express Foundation Specialization is a prerequisite for Cisco Premier Certified Partners.

The Cisco Resale Channel Program provides partners with the training required to build sales, technical and Cisco Lifecycle Services skills, and then validates their skills through a third-party audit. Cisco resale partner certifications—Select, Premier, Silver and Gold—represent an increasing breadth of skills across key technologies and a partner’s ability to deliver integrated networking solutions. Cisco resale partner specializations—SMB, Express, Advanced and Master—reflect an increasing depth of sales, technical and service expertise in particular technologies. Cisco specializations provide Datanamics access to sales, technical, and lifecycle services training and support available from Cisco.

About Datanamics Inc.

Founded in 1977 and headquartered in Henderson, Nev., Datanamics has differentiated itself in the marketplace by providing single-source, sophisticated networking and information technology solutions to a variety of industries, working with clients to provide affordable and stable systems that define industry standards. The firm's Educational Services division takes network support one step further by offering advanced technical training and certification courses in various software and hardware competencies. With three decades of committed customer service and extensive knowledge as its foundation, Datanamics is a solid, experienced partner with clients on the local and national levels.
