### **Datanamics, Inc. Renews Premier Certification from Cisco®**

(Henderson, Nev.) – Datanamics, Inc. announced today it has renewed its Premier Certification from Cisco®. To renew this certification Datanamics must continually meet standards for networking competency, service, support and customer satisfaction set forth by Cisco.

“We are pleased to once again renew our Premier Certification from Cisco, which enables us to promote our expertise and relationship with Cisco to our customers,” said Terrence McGowan, president of Datanamics. “The benefits provided allow us to continue to enhance the offerings that we offer to customers.”

“Cisco is committed to providing tools, training and programs to help drive partner growth, differentiation and profitability,” said Surinder Brar, senior director of worldwide channels at Cisco. “With specializations in Advanced Wireless LAN, SMB Specialization and Advanced Unified Communications, Datanamics has made an investment in delivering the integrated and customized technology solutions today’s customers demand.”

As a Cisco Premier Certified Partner, Datanamics demonstrates a range of technical expertise. To achieve Cisco Premier Certification, Datanamics was required to achieve the Cisco Express Foundation Specialization. This specialization includes tests on technical competency in the integration of basic routing and switching, wireless LANs, and security technologies. In addition, Datanamics was required to integrate a base level of Cisco Lifecycle Services into its offerings and demonstrate measurably high levels of customer satisfaction based on independently audited customer satisfaction surveys.

The Cisco Resale Channel Program provides partners with the training required to build sales, technical and Cisco Lifecycle Services skills. Cisco resale partner certifications—Gold, Silver, Premier and Select—represent an increasing breadth of skills across key technologies and a partner’s ability to deliver integrated networking solutions. Cisco resale partner specializations—Master, Advanced and Express—reflect an increasing depth of sales, technical and service expertise in particular technologies.
