

## Microsoft Lync 2010 Pilot

*Take A Test Drive -  
The Most Cost Effective  
Business Communications Solution  
On The Market*

**Collaborative**

**Engaging**

**Immediate**

**Productive**

Microsoft Lync Server 2010 ushers in a new connected user experience transforming all forms of communication into an interaction that is more collaborative, engaging, and accessible from anywhere. For IT, the benefits are equally powerful, with a highly secure and reliable system that works with existing tools and systems for easier management, lower cost of ownership, smoother deployment and migration, and greater choice and flexibility.

### *Microsoft Lync Pilot Overview . . . .*

Datanamics has available to qualified companies a 30-Day U.S.-based hosted and managed pilot program for the Microsoft Lync solution. The pilot program gives selected members of a company's staff the opportunity to utilize a modified version of the program for a 30 day period. During this time the selected staff members will experience a realistic test of the actual product, and how its features integrate within their environment.

Strategically choosing staff members to participate in the pilot program, will provide valuable user experience feedback from a variety of perspectives.

There is no setup or configuration on your part, Datanamics supplies the required infrastructure for the duration of the pilot deployment. There are 3 pilot plans to choose from each ranging in cost and feature preferences, from instant messaging and presence to voice integration and external voice / video capabilities. You pick the plan that best suits your needs.
